

Configure DokuWiki to use FreeIPA authentication

Install the [authldap plugin](#) and store the following configuration file under configs/:

[local.protected.php](#)

```
<?php
$conf['authtype'] = 'authldap';
$conf['superuser'] = '@admins';
$conf['plugin']['authldap']['server'] = 'ldaps://auth.example.com';
$conf['plugin']['authldap']['port'] = 636;
$conf['plugin']['authldap']['usertree'] =
'cn=users,cn=accounts,dc=example,dc=com';
$conf['plugin']['authldap']['grouptree'] =
'cn=groups,cn=accounts,dc=example,dc=com';
$conf['plugin']['authldap']['userfilter'] =
'(&(uid=%{user})(objectClass=posixAccount))';
$conf['plugin']['authldap']['groupfilter'] =
'(&(member=%{dn})(objectClass=posixGroup))';
$conf['plugin']['authldap']['version'] = '3';
$conf['plugin']['authldap']['debug'] = 0;
```
